ICNS 2021

ICNS Introduction

The ICNS Conference highlights research on themes in cultural neuroscience and emerging issues for training and advocacy.

Goals of the ICNS 2021 Conference

- To promote an international scholarly society in cultural neuroscience.
- To support the scholarly activity of research, training and advocacy on cultural neuroscience.
- To support international cooperation and scientific progress in cultural neuroscience.
- To promote global awareness of emerging issues in cultural neuroscience.

ICNS 2021

ICNS Welcome Remarks

Dear Conference Participants,

We are delighted to welcome you to the 2021 Conference on Global Education of the International Cultural Neuroscience Society.

This year's conference theme on Global Education highlights the importance of global education and health equity in a global context. Global education is important to the attainment of the highest standards of education in a global context. The goal of global education is a chief priority in the development of nations. Global education ensures quality of education and a lifetime of learning. The promotion of global education contributes to the societal conditions that are important for health equity. Mental health promotion that is equitable ensures the health and well-being of all.

There are three main goals of this year's conference. One main goal is to highlight the research in cultural neuroscience on Culture, Cognition and Aging. A second main goal is to highlight research in cultural neuroscience and global mental health on Building Capacity in Cultural Neuroscience and Global Mental Health. A third main goal is to highlight research in Cultural Neuroscience and Public Policy.

This year's conference provides opportunities to learn about international and national initiatives for research and training in cultural neuroscience. The conference supports advocacy and policymaking in recognition of the International Day of Education.

We are truly grateful to members for their support.

Kind regards,

Conference Committee

International Cultural Neuroscience Society

ICNS 2021

ICNS Symposium on Cultural Neuroscience

Cultural neuroscience

The ICNS Invited Symposium on Cultural Neuroscience consists of a featured theme on the role of cultural influences on the neurobiological bases of behavior.

Cultural neuroscience and development

Joan Y. Chiao

International Cultural Neuroscience Consortium

Research on cultural neuroscience investigates cultural influences on neural mechanisms of behavior across development. Developmental aspects of cultural neuroscience consider the role of contextual and environmental influences of culture on the neurodevelopmental trajectories of behavior. Culture interacts with environmental influences and neurobiological mechanisms in developmental trajectories. Culture affects the functional correspondence of cultural and neural changes on behavior. Research on cultural neuroscience builds evidence-based resources on culture and health in human development. The social and cultural competence of health and human development is fundamental to quality of life and life long learning.

ICNS 2021

ICNS Symposium on Culture, Cognition and Aging

Culture, Cognition and Aging

The ICNS Invited Symposium on Culture, Cognition and Aging consists of a featured theme on the role of cultural influences on the cognition of the aging population.

ICNS 2021

ICNS Workshop on Cultural Neuroscience and Global Mental Health

ICNS Workshop Registration

ICNS Workshop Program

ICNS Symposium on Cultural Neuroscience and Global Mental Health

Theme on Global Education

Cultural neuroscience, development and global mental health

Joan Y. Chiao

International Cultural Neuroscience Consortium

The research priorities of culture and health promote health and human development. Mental health promotion programs on culture and health contribute to health and human development. The development of the strategies of culture and mental health promotion are important to culture and the equitable access to resources of societal equality. The evidence-based knowledge of culture and health and its mechanisms contributes to the prevention of disease and the promotion of well-being. The development of the programs of mental health prevention and intervention are important for the promotion of culture and health. The evidence-based resources of culture and health are important to inform the programs of mental health promotion. Culture and mental health promotion consider the equitable access to education and information as essential to culture and health equity.

ICNS Workshop Discussion Panel

ICNS Workshop Poster Session

ICNS Workshop Closing Remarks

Co-Sponsor International Cultural Neuroscience and Global Mental Health Network

ICNS 2021

ICNS Awards and Prizes Ceremony

International Cultural Neuroscience Society

Awards and Prizes

2021 Recipients

Distinguished Scientist Award

The Distinguished Scientist Award is in recognition of an outstanding achievement in the senior career of a scientist in the field of cultural neuroscience.

Dr. Tetsuya Iidaka

Mentoring Scientist Award

The Mentoring Award is in recognition of an outstanding mentorship to training scientists in the field of cultural neuroscience.

Dr. Joan Chiao

Young Investigator Award

The Young Investigator Award is in recognition of outstanding achievement in the early career of a scientist in the field of cultural neuroscience.

Dr. Tokiko Harada

ICNS 2021

ICNS Awards and Prizes Ceremony

International Cultural Neuroscience Society

Awards and Prizes

2021 Recipients

Science and Diplomacy Award

The Science and Diplomacy Award is in recognition to a scientist or group of scientists whose exemplary contributions in the field of cultural neuroscience represent outstanding efforts in science and diplomacy.

Dr. Joan Chiao and Dr. Tetsuya Iidaka

Outstanding Humanitarian Award

The Outstanding Humanitarian Award is in recognition to an individual or group whose exemplary contributions in the field of cultural neuroscience represent outstanding humanitarian efforts in science and diplomacy.

Dr. Joan Chiao, Dr. Hazel Markus and Dr. John Gabrieli

ICNS 2021

ICNS Awards and Prizes Ceremony

International Cultural Neuroscience Society

Awards and Prizes

2021 Recipients

Fields Prize

The Fields Prize is in recognition of a significant accomplishment that represents a substantial contribution to two or more related areas in the field of cultural neuroscience.

Dr. Joan Chiao and Dr. Tetsuya Iidaka

Innovation Prize

The Innovation Prize is in recognition of a theoretical or methodological innovation that represents a significant advancement in the potential for discovery and delivery science in the field of cultural neuroscience.

ICNS 2021

ICNS Forum on Cultural Neuroscience and Human Rights

Co-Sponsor International Cultural Neuroscience and Human Rights Network

ICNS Forum on Cultural Neuroscience and Human Rights

Universal education is important for sustainable development. The access to universal education is a fundamental component of the fulfillment of human rights. Research in cultural neuroscience contributes to the design of preventions and interventions in global mental health. The goal of this meeting is to discuss contributions in cultural neuroscience for the achievement of the highest standards of global education as a fulfillment of human rights. The presenters will speak on cultural neuroscience and the fulfillment of human rights.

ICNS Forum Registration

ICNS Forum Program

ICNS Symposium on Cultural Neuroscience and Public Policy

Cultural neuroscience and global education

Joan Y. Chiao

International Cultural Neuroscience Consortium

The protection of human rights and human freedoms is essential to quality of life and human fulfillment. The promotion of the protections and empowerment of mental health and well-being is important for human development and the fulfillment of human potential. The equitable access to the resources of education and health promotes human development. The promotion of mental health and well-being ensures the equitable societal resources for the societal coordination of social action. Quality education ensures the opportunities of societal equality and life long learning. The highest standards of quality higher education ensure the protections and empowerment of life long learning. The promotion of social and cultural competence in educational and health programs is beneficial to the building of peaceful, inclusive and tolerant societies. The promotion of culture and health in human development ensures the achievement of educational and health equity for all.

ICNS 2021

ICNS Closing Remarks

Dear Conference Participants,

Thank you for attending the 2021 Conference on Global Education of the International Cultural Neuroscience Society.

We are delighted to highlight the importance of global education and health equity in a global context. Global education is an important priority to the development of nations. The highest standards of global education ensures the equitable societal conditions that promote health equity. Health equity is fundamental and necessary for the development of individuals, societies and nations. Mental health promotion that ensures health equity ensures the attainment of health and well-being for all.

Evidence-based approaches in cultural neuroscience inform the practice and policy of health. Advancement of research in cultural neuroscience furthers understanding of preventions and interventions in mental health for the global population. Research in cultural neuroscience contributes to addressing grand challenges in global mental health. Research in cultural neuroscience helps to inform advocacy and policymaking on the important goal of the highest standards of global education for human development in human rights.

International and national initiatives for research and training in cultural neuroscience contribute to capacity building and research infrastructure in mental health. Building awareness of global education is important for the attainment of health equity in a global context.

We are truly grateful to members for their support. We hope to see you next year.

Kind Regards,

Joan Chiao

Joan Chiao, Co-Chair

ICNS 2021

ICNS 2021 Advocacy and Policymaking

Global Education

The ICNS 2021 Conference Theme on Global Education centers on the international cooperation to support scientific research on mental health around the world.

The ICNS 2021 Conference highlights research on cultural influences on Global Education.

Research themes of the ICNS 2021 Conference include the following:

- Cultural neuroscience
- Culture, cognition and aging
- Cultural neuroscience and global mental health
- Cultural neuroscience and public policy

The ICNS 2021 Conference supports international research and training on cultural neuroscience that builds global awareness of mental health.

- Build awareness of the importance of mental health around the world.
- Share international research on cultural neuroscience.
- Discuss the impact of international research on cultural neuroscience for mental health practice.
- Discuss the impact of international research on cultural neuroscience on mental health reform.
- Connect with other cultural neuroscience researchers on emerging issues in global mental health.

ICNS 2021

Advocacy

International Day of Education

24 January of 2021

Build Awareness of Global Education

ICNS 2021

ICNS Conclusion

The ICNS 2021 Conference promotes the scholarly activity of the members of the ICNS.

The ICNS 2021 Conference supports the international cooperation for the advancement of scientific progress in cultural neuroscience.

The ICNS 2021 Conference supports international research and international training in the field of cultural neuroscience.

The ICNS 2021 Conference promotes global awareness of emerging issues in cultural neuroscience and global mental health as well as cultural neuroscience and public policy.

ICNS 2021

ICNS Future Meetings

- ICNS 2022 (Netherlands)
Theme on Peace and Justice
Conference Chair, Dr. Jack van Honk (Utrecht University)

13 and 14 October 2022
- ICNS 2023 (USA)
Theme on Maternal and Child Health
Conference Chair, Dr. Tamara Lewis-Johnson (NIH)

12 and 13 October 2023
- ICNS 2024 (USA)
Theme on Gender Equality
Conference Chair, Dr. Elizabeth Losin (University of Miami)

10 and 11 October 2024
